1st STOP CHECKLIST: ANIMAL WASTE REMOVAL

REQUIREMENTS & REGULATIONS

Animal waste is considered a solid, and possibly hazardous, waste by the Ohio Environmental Protection Agency (EPA). Contact the Ohio EPA at (614) 644-3020 for general inquiries or (800) 329-7518 for the Small Business Hotline; for specific collection and disposal regulations and permit information. The Ohio EPA is also on-line at www.epa.state.oh.us.

*Remember to check local government agencies*

For more help, contact your local Small Business Development Center (SBDC).

*REMEMBER TO CHECK LOCAL GOVERNMENT AGENCIES*

THIS CHECKLIST IS ABOUT STATE REQUIREMENTS.
Fact Sheet

Introduction
As a business owner, it is important to know if you generate hazardous waste. Under Ohio EPA’s rules, all wastes generated from a business must be evaluated to see if they are hazardous or not. Ohio EPA has specific rules on how hazardous waste needs to be handled and disposed. For businesses that generate hazardous waste, there are also record keeping requirements to comply with.

What is a hazardous waste?
If you have a material that can no longer be used, it is considered a waste. There are two ways in which your waste can be classified as a hazardous waste:

Listed hazardous wastes
If your waste appears on any one of the lists published in Ohio’s hazardous waste regulations, it may be a hazardous waste when disposed. These hazardous waste lists are published in the Ohio Administrative Code (OAC), rules 3745-51-31 through 3745-51-33. There are four different types of listed wastes. Each waste on the list is assigned a hazardous waste code.

Characteristic hazardous wastes
If you find that your waste does not appear on the F, K, P or U lists in Ohio EPA’s rules, your waste may still be regulated if it exhibits a hazardous characteristic. In the rules there are four characteristics that could cause a waste to be regulated as hazardous.

Knowing the EPA waste codes that apply to your wastes is important because these codes identify the specific type of waste generated by your company. They also help identify the waste as it is being transported, treated and disposed of.

Do small businesses generate hazardous wastes?
Yes! Many small businesses are hazardous waste generators. Even if a business generates only a small amount of waste, the waste must still be evaluated and, if it is hazardous, properly managed.

Some of the small businesses that are commonly hazardous waste generators include:

- auto repair shops
- auto salvage yards
- body shops
- construction
- dry cleaners
- laboratories

Listed Hazardous Waste Codes and Descriptions

<table>
<thead>
<tr>
<th>Hazardous Waste Code</th>
<th>Waste Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>F wastes:</td>
<td>These listed wastes come from general processes such as cleaning, degreasing, metal finishing and manufacturing.</td>
</tr>
<tr>
<td>K wastes:</td>
<td>These listed wastes come from specific industrial processes, such as chemical or pesticide production, petroleum refining and metal manufacturing.</td>
</tr>
<tr>
<td>U wastes:</td>
<td>These listed wastes include unused, off-specification or discarded commercial chemicals. For example, if you have a process or lab chemical that has exceeded its shelf life and can’t be used, this chemical may be a U waste.</td>
</tr>
<tr>
<td>P wastes:</td>
<td>Like U wastes, these wastes are also unused, off-specification or discarded commercial chemicals. The P wastes are, however, more toxic than U wastes.</td>
</tr>
</tbody>
</table>

Hazardous waste codes for the above wastes include either an “F,” “K,” “P,” or “U” followed by three digits (e.g., F001, K062, U122, P018).
Identifying Your Hazardous Waste

How do I evaluate my waste?

First, you must know about ALL the wastes that come from your business. Go through your business and make a list of all your wastes (include even those that you think are not hazardous). Go through the list and carefully evaluate each waste stream. Some wastes are excluded from the hazardous waste rules. These include, for example, certain wastes that are recycled. You should see if any of your wastes fall under these exclusions in the hazardous waste rules (OAC 3745-51-04). For wastes that aren’t excluded, you need to be able to answer the following questions:

- Is the waste on Ohio EPA’s F, K, P or U lists of hazardous wastes?

Note: In most cases, any waste that is mixed with or derived from a listed waste is also considered listed—and hazardous. An example of “mixed with” is mixing an F-listed solvent with antifreeze. An example of “derived from” includes distillation bottoms from distilling an F-listed solvent.

- Does the waste have any of the hazardous waste characteristics?

Collect information that might be helpful to you in evaluating your waste. This may include information from your vendor, supplier or Material Safety Data Sheets (MSDS) with product information. Keep any information that you use to make your waste evaluation in your files. If your business is ever inspected by a hazardous waste inspector, the inspector will want to review this information.

<table>
<thead>
<tr>
<th>Hazardous Characteristic</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ignitability:</td>
<td>The waste is a liquid and has a flash point of less than 140 degrees F (60 degrees C) or could catch fire under certain circumstances. Examples include: solvents, mineral spirits and paint waste. Ignitable hazardous wastes are assigned the EPA hazardous waste code of D001.</td>
</tr>
<tr>
<td>Corrosivity:</td>
<td>The pH of the liquid waste is very low (two or less) or very high (12.5 or greater). Or, the waste can corrode metal. Examples include: acids or alkali cleaning baths and battery acid. Corrosive hazardous wastes are assigned the EPA hazardous waste code of D002.</td>
</tr>
<tr>
<td>Reactivity:</td>
<td>The waste is unstable, reacts violently, explodes or produces toxic vapors under certain conditions. Examples: cyanide or sulfide wastes and peroxides. Reactive hazardous wastes are assigned the EPA hazardous waste code of D003.</td>
</tr>
<tr>
<td>Toxicity:</td>
<td>The waste has specific toxic contaminants present in high enough concentrations to be harmful to humans or the environment. The toxic contaminants and their threshold levels are included in Ohio’s hazardous waste regulations (OAC rule 3745-51-24). Examples include wastes that contain heavy metals (e.g., lead, chromium, mercury, cadmium) or certain chemicals (e.g., benzene, MEK, pesticides). Toxic hazardous wastes are assigned the EPA hazardous waste codes of D004 through D043, depending on the contaminant(s) present.</td>
</tr>
</tbody>
</table>

- machine shops
- manufacturing
- medical clinics
- metal finishers
- painters
- photographers
- printers
- sandblasting
- wood refinishers
Identifying Your Hazardous Waste

If you do not have enough information from the process to evaluate a waste, you will need to have the waste sampled and sent to an environmental testing lab for analysis. Keep any lab results you have on your waste in a file.

Some of the common hazardous wastes that are generated from small businesses are listed below. These are just some examples of hazardous wastes that may be generated by your business. However, there may be others that are not listed below.

Where can I get more help?
If you have any questions about how to evaluate wastes from your business or any other questions about Ohio’s hazardous waste rules, contact either office listed below.

Ohio EPA
Division of Hazardous Waste Management
(614) 644-2917
www.epa.ohio.gov/dhwm

Ohio EPA
Office Compliance Assistance and Pollution Prevention
(800) 329-7518
www.epa.ohio.gov/ocapp

You can also contact your local Ohio EPA district office, Division of Hazardous Waste Management. See map on next page to locate district office which covers your area.

What are some options for reducing the amount of waste my business generates?

There are many opportunities for businesses to reduce the amount of hazardous waste they generate, even for small businesses. These options can range from simply improving housekeeping practices to making process changes.

Reducing waste can save your company money, reduce environmental liability and regulatory burdens. To find out more about pollution prevention options for your business, contact Ohio EPA’s Office of Compliance Assistance and Pollution Prevention at (614) 644-3469 or (800) 329-7518.
